Mark,

I am tied up this week other than tomorrow morning or Thursday morning (which does not work well with the time difference) or Friday (which is government holiday).

Leo,

Is there anyway to do the call this week ? I am out of the Country from 11/11-11/22 and would not be able to join the call on the dates you suggested.

Carmen,

I am not available for a call on Wednesday, November 9, 2016 at 12:00 pm to 1:00 pm EST. Please note that I did not receive your emails from November 3, 2016, as those were sent to my CBS email box (Leo.Brausch@cbs.com) and not to my office email (lbrausch@brauschenv.com). As I have requested in the past, please do not use the CBS account since I no longer have an office at CBS and only check that mailbox very infrequently. I suggest you delete that address from your contacts.

I have apparently missed several emails and will now go back through those to catch up. With respect to a conference call, I can do the following times next week (I understand you are not available Thursday or Friday of this week):

Monday, November 14: 11:00 am to 3:30 pm EST
Tuesday, November 15: 11:00 am to 12:00 pm EST
Friday, November 18: 11:00 am to 3:30 pm EST

Please let me know what works with you.

Carmen,

This would work for the Hager Pacific team though Rob Neal would only be available for the first 45 minutes.

Please circulate a dial in number.

thx

Hello,

Given some last minute changes in my work schedule and appointments, I will need to move the call to Wednesday November 9, 2016, 12:00 pm to 1:00 pm ET (9:00 to 10:00 am PT). I just found out about a few appointments that are back on my calendar.

Best,
Carmen

Subject: Former Westinghouse Facility Building, Rancho Dominguez, CA - Follow
Up Call

Greetings,

I am responding to Leo's November 1, 2016 email proposing dates and times for a follow-up call on the former Westinghouse facility and specifically, the former facility building. The call is to go over (1) Leo's November 1, 2016 email together with EPA's October 25, 2016 email containing comments on the draft outline for the PCB cleanup application and (2) solve any issues that remain from the previous call. One desired outcome from this call is a schedule from CBS / Hager Pacific to submit a revised outline for the PCB cleanup application and the actual draft application for EPA's review. I would like to receive and finalize agreements on the second draft of the outline for the PCB cleanup application by November 16, 2016.

The application is to address the cleanup of PCBs in the interior of the building, which is a high priority. Cleanup of PCBs that may be present in other areas of the facility and the adjacent railroad spur will be discussed at a later date.

November 11, 2016 is Veterans Day, an observed federal holiday. For the call next week, I am considering November 10, 2016 from 1:00 pm to 2:30 pm ET (10:00 am to 11:30 am PT).

Please let me know if the date and time that I am considering for the follow-up call is also convenient for you.

Finally, as one next step from the September 28, 2016 call, CBS would confirm the cleanup and screening levels for PCBs in the interior of the building. The literature references used in determining a reasonable value for PCBs in non-porous surfaces inside the building were provided to CBS. We would like to receive confirmation of the cleanup and screening levels that CBS / Hager Pacific plan on applying to the interior of the building during the follow-up call that we are scheduling for the week of November 7, 2016.

Thank you for your courtesies.

Best,
Carmen
